'57 Rhodes Scholarship Won By Union President

Robert Gualtieri, 20-year-old McGill University student has been selected as one of two Rhodes Scholars of 1957 from Quebec. The other Quebec scholar is Guy St. Germain from the University of Montreal.

Robert, a 4th year honours student in Philosophy, graduated from Montreal High School, and entered McGill with the Sir Rhodes Scholar

scholarship. In 1955 he was a member of the Intermediate Championship football team.

Study At Oxford

The Rhodes Scholarship of £600 per year provides for 2-3 years tuition at Oxford University, where Gualtieri plans to take advanced studies in Philosophy-Politics-Eco-

nomics. Having completed his course, he intends to enter the diplomatic corps or university teaching.

A Rhodes Scholar is chosen on the basis of literary and scholastic attainments, qualities of leadership and manhood, and participation and success in outdoor sports.

Hungarian Freedom Train Delayed—Welcome Planned

The "Freedom Train" carrying a contingent of Hungarian students will be delayed until the end of the month according to a Canadian Press Report. The train was previously scheduled to arrive at Montreal this week.

One group of students arrived on the Empress of Britain and the members are currently staying in St. John's, New Brunswick. They will wait for two other groups which are scheduled to arrive by the end of the month. Then the whole ensemble will board the "Freedom Train" which will carry the Hungarians to western Canada where a forestry school is going to be established for them.

The train will stop at various

cities along the route where they will receive civic receptions. Sir George Williams, University of Montreal, and McGill have formed a committee to organize a mass welcoming of Montreal students. Ralph Ordower of McGill is chairman of this committee. Similar welcoming groups have been planned by university students in the Ottawa and Toronto areas.

Direct teletype service to St. John's by the Red Cross is expected to confirm today the exact date of the arrival of the train.

Gift of E. M. Wilson

\$500,000 Granted for Scholarships

Dr. F. Cyril James, Principal and Vice Chancellor announced recently that by the will of the late Edgar Moles Wilson McGill University would receive eventually over half a million dollars and until the year 1966 would receive the income on the estate under a trust established in the will which reads as follows:

"The net annual revenue to be used for the establishment and maintenance of scholarships, in the case of boys to be known as the Edgar Wilson Scholarship and in the case of girls as the Margaret Wilson Scholarship, to assist boys and girls in obtaining higher education in any one or more of the Faculties of McGill University in the Province of Quebec, and more particularly for students of merit requiring monetary assistance for such purpose.

The amount of each scholarship is to be \$600 per annum, and to be granted from year to year after the first year if the application and progress of the student for the preceding year is deemed by the Faculty satisfactory to warrant continuation thereof; provided that the conditions herein expressed are to be deemed merely recommendations and are not to restrict the discretion of the Governors of McGill University in awarding from time to time such scholarship so as to best attain in their judgment the greatest benefit from the application of these funds."

After 1966 the University will receive the whole fund to administer as a scholarships fund under the above terms.

Former Resident

Edgar Moles Wilson was formerly a resident of Montreal, his firm being the Budge Carbon Paper Company. Neither he nor his wife had any connection with the University but because of his own early privations he was extremely anxious to provide educational opportunities for others, and when he died in West Palm Beach in 1952 after making certain other provisions he left his entire estate to McGill University as a scholarships fund. Mrs. Wilson died in 1956.

Dr. James said that the Board of Governors and Senate were very happy indeed at this time to receive such a splendid contribution to student financial aid at McGill University. The University under the terms of this bequest would be able when the scheme is in full operation to provide as many as thirty scholarships a year for deserving and needy students at

ARTS AND SCIENCE

Course Changes - Second Term

The change of course period for the second term will extend from January 14 to January 23 (5 o'clock). During this period students in the Faculty of Arts and Science may change their registration in second term courses only, so that they may drop a second term course for which they registered originally and replace it by another approved second term course.

In order to be properly registered the student must effect this change by completing the official change of course forms available in the Assistant Dean's office. These forms (3 in number) must be completed and turned in by the student who should call back within five days to receive his copy which will be signed if the change is approved. Merely turning in the forms does not constitute authority for the change and it is the student's responsibility to ascertain that the change has been approved.

Positively no changes will be considered after this deadline date of January 23.

Editorial

Beware

We would like to extend our sincere condolences to the 12% of the Faculty of Science at Queens' University who were graduated rather forcibly this past Christmas. We feel that, despite the elaborate farewell ceremony prepared for them by their surviving brethren, January of 1957 will be for them a bleak month. We believe that the offer of the Queens' administration in granting to students who feel they have gotten off to a slow start the option of leaving voluntarily now and beginning afresh next year without a blemish against their academic record is, under existing circumstances, a wise move. A similar offer on the part of the McGill Administration might be of considerable advantage.

Perusal of the extracurricular activities for the forthcoming week indicates the need for an evaluation of purpose on the part of McGill Students. Considering that there is a major dance every single weekend until the fifteenth of March and that in this, a relatively quiet week, there are two dances, an Art Exhibit, the Javel Exchange Weekend, a major Musical Concert and a variety of smaller but equally time consuming activities the process of conscious evaluation and selection becomes essential. Otherwise the Christmas Massacre at Kingston may be repeated at McGill in May.

Presley and Prudence

It is very seldom that we feel so deeply moved by somebody's consideration that we deem it necessary to editorialize on it. However, such a situation did arise last week, and it touched us so deeply that we feel compelled to publicly thank the people connected with CBS for preserving the innocence of the North American people by not televising Elvis Presley's hips. Not once in his whole performance did the camera focus on what we believe his crotch felt. In fact, when his whole body went berserk in the middle of his last song, the viewers were treated to a thrilling view of his guitarist.

It gives us a warm feeling deep down inside to know that there are still people alive who would not let any low vulgar enter the sanctity of our living rooms. If these fine gentlemen were not around to protect us, that one programme might have sown seeds of havoc that could never have been remedied. Our pure untainted children — the future leaders of our nation — might have seized upon this Presley pattern of behaviour and accepted it as a normal way of carrying themselves.

Due to great prudence, our country has been saved. Thank CBS.

Have A Hart!

There is a certain nostalgia that hangs around the Ruin of Sherbrooke St. The McGill Union, bursting at the seams, and sitting slowly on its foundations, has about it a venerable air, a charm that comes with age, and which is the buildings only secret. Not until he visits other University Unions does the McGill Student realize how much he is missing.

This editorial is really a paean of praise about one Union — Hart House, the Men's Union at the University of Toronto. By combining all that is best in an English college residence with the newest in modern facilities, Hart House has taken and blended the best of both worlds. Styled in non-cargyle Gothic, the building is built around a quiet quadrangle. The sun streams through leaded windows overlooking the quiet of the inner (Continued on page 7)

As Others See It

Why Are We Studying

R. G. Jones, University of North Wales

Half a century ago, university students were the future leaders of society because their birthright included that privilege. Politicians and local bureaucrats, who seem to possess a remarkable genius for failing to keep up with realities, still assume that university students are future leaders of society, now by reason of ability.

They consistently ignore two government spends from six hundred to a thousand pounds to educate an individual who will not gain materially in the end. Neither outstanding objections. Ability is no longer the first prerequisite of success; and the possession of ability is useless in any case without the desire to use it. And the plain fact is that the university student, like everyone else, will only apply his abilities to the task of earning enough money to get married, or to buy television, or to afford the newest model in fast cars. He will not use them to sharpen his own perceptions.

Widespread education has not meant any increase in the disinterested pursuit of knowledge, or in a wider appreciation of the mysteries of life, be they artistic or scientific. Society lays no store by any kind of culture, apart from that surface polish which enables a man to choose the right fork for the fish course. It would be as well to realise this, although society, as a whole, having regard to its own self-esteem, would never admit it. At bottom, society's regard is for prosperity, and culture is tolerated only if it does not constitute a drain on the communal resources; it is not regarded as a branch of its being which is in need of nurturing.

No Gain

Once this fact is admitted, the position of the university student becomes anomalous. He does not gain materially from his three to six year period of study, for his salary, should he eventually attach himself to any calling which has about it a taste of culture, will not be greater than if he had left school at the age of fifteen. Yet he has been urged from childhood to work hard to pass examinations which, in the end, seem to bring him no nearer to any goal which he wishes to reach. Moreover, his parents, as representatives of a society which supports him, still assume that this is for his greater well-being, while the

Letters To The Editor

What! No Buffet?

Those who went to the McGill Prom at the end of the last term, may have been surprised, even disappointed, to find that there was no buffet supper provided as advertised. On behalf of the Prom Committee, I should like to apologize for this apparent oversight, but should also like to take this opportunity to explain its cause.

The Students' Executive Council, that admirable body under whose name the Prom was presented, being, I admit, conscientious with their money, finally brought themselves at the eleventh hour to some sort of a decision. They decided that they could not afford a buffet and took back the funds provided for it, thus making it impossible.

I do not condemn the action taken, as such, or disagree altogether with the reasons for it, but I do feel that out of respect for common courtesy, consideration, and for businesslike procedure, the S.E.C. should make its decisions on such things a little earlier than forty-eight hours before the event, long after all advertisement and arrangements have been completed.

William H. Bonney,
Arts 3.

will he serve more usefully in a society which does not possess values which he has been forced to take for granted.

Deans Discuss Excess College Applications

By Ron Caplan

What is going to happen to the ever increasing flood of applications to the limited facilities of present day universities? The role that a new admission policy might play in such a situation was recently reviewed in a panel discussion by William J. Bender, Dean of Admissions and Financial

McGILL'S DEAN FIELDHOUSE

Aid at Harvard University and Dean Fieldhouse, of the Faculty of Arts and Science at McGill.

NEED NEW POLICY

Dean Fieldhouse stated that at present there were three "main avenues" into McGill. These are the Protestant and Catholic matriculation and the McGill entrance examinations. However, he affirmed that these could be improved upon. At present, he stated, matriculation examinations here are so moderate that they are best used in a negative sense. Those students who can barely pass them are not suited for college. He pointed out that most freshman failures occur in that group which has gained only 5% above a pass 2% of Harvard freshmen fail in the matriculation examinations their first year. Ninety percent

HARVARD METHOD

Dean Bender emphasized that at Harvard College, formal examination of potential freshmen is not sufficient. At Harvard, there are four reasonably qualified candidates for every place in the first year class. This is the situation that Dr. F. Cyril James, who was chairman of the discussion, anticipates for McGill in future years.

Applicants for admission to Harvard College are given one multiple choice examination which measures "scholastic aptitude". As well, they take three subject matter tests on topics of their own choosing.

On the basis of these tests, said Dean Bender, roughly the top 10% of candidates are admitted. The bottom 2-5% are rejected "without question."

PERSONALITY EXAMINED

The large majority of applicants remaining are selected on the basis of other qualities, such as character, personality, creative ability, and the like.

The effectiveness of the interview in judging applicants was questioned by Dean Bender, who maintained that this method of selection was only useful when carried out by qualified personnel.

Dean Bender pointed out, however, that some of these problems would not have to be faced by Canadian universities, as Canadian high schools are more strictly controlled by the provincial governments than similar schools in the U.S. Much more faith can be put, therefore, in the marks obtained at high school, as curriculum and marking methods remain fairly constant.

ONLY 2% FAIL

The success of Harvard's methods are shown, said Dean Bender, by the fact that only 2% of Harvard freshmen fail in the matriculation examinations their first year. Ninety percent

of Harvard undergraduates get a degree.

Dean Fieldhouse agreed that other qualities besides intelligence

HARVARD'S DEAN BENDER

are necessary to a university student, but he emphasized that without the basic intelligence, no number of other qualities would suffice. He listed motivation among the most important attributes needed by the student.

COMMITTEE EXECUTIVES WILL BE CHOSEN FROM STUDENT APPLICATIONS

The Students' Executive Council today inaugurates a new program to facilitate the choosing of committee chairmen for the various activities sponsored by the Students' Society. Under this plan, the Executive Application Programme, anyone on the campus will be able to apply for the chairmanships of these committees.

The aim of the SEC in throwing open these posts to any student wishing to apply is two-fold. Firstly, it will serve to increase student participation at an executive level. In addition, it will guarantee that the most suitable person for the position is chosen.

A notice dealing with the applications for the Executive Application Programme is printed elsewhere. All applications must be returned by the date noted.

A special committee will review the applications in an effort to

select the best qualified applicant. In addition, the recommendation of the past executive of the particular committee concerned will be considered. All prospective candidates will be interviewed by the special committee.

YOUR
RESTAURANT

ATTENTION ALL EXECUTIVES

It is imperative that all club and society write-ups be handed in to the Annual immediately or they will not appear in the Annual.

Final Plans Readied For Exchange Weekend

The Student Exchange Committee is suggesting that students

The following are the rehearsals scheduled for the next few days. All rehearsals will be held in the Union.

MONDAY: 5:30 — Identity Song; 7:30 — Deb Waltz (all female); 9:30 — Perron, Fairly, Tidell, Gross, Rayner, Donaghy, Wollend.

TUESDAY: 5:30 — Identity Song; 6:30 — Don't be Highbrow (Nancy Bacall and six male dancers to be chosen); 7:30 — Parliament Scene (All men in cast).

WEDNESDAY: 1:00 — Defense Scene; 3:00 — Defense Scene; 6:30 — Don't be Highbrow; 7:30 — Parliament Scene; 9:00 — Deb Waltz and Rock 'n Roll (all male dancers and Cox, Duffield, Wright, Bruneau, Tiger, Segal).

There will be a meeting tonight at 6:30 for the entire Production Staff and cast in the Walter M. Stewart Room of the Union.

should keep this weekend free. Final plans are being made for the 35 men and women who will be arriving from Laval University on Thursday night. Ralph Ordower, former Chairman of the External Affairs Department said that they have reports on good authority that the female component of the Laval contingent will be most entertaining.

All students are encouraged to participate in the weekend program and especially to show up to meet the train Thursday night at 10:30 p.m. to establish a welcoming atmosphere.

FORGE DEADLINE

Forge deadline for second issue January 16. Submitted to George at the Tuck Shop.

ONE OF A SERIES
by IBMer Bill Read

What is this IBM?

IBM is many things. Physically it's International Business Machines Company Limited with a quarter-mile long ultra-modern factory located in the suburbs of Toronto, a group of twenty-one branch offices in the principal cities of Canada, a private golf and country club where employees spend their leisure, and a large group of intelligent men and women who proudly give themselves the strange title of IBMers.

People who work at IBM call themselves IBMers because it's the natural thing to do. And it's the natural thing to do because the company is friendly. It's friendly enough to pay your hospital bills when you're sick, to provide you with a pension plan and up to \$25,000 life insurance. But more than that, it encourages you to grow with the ever-expanding business, to advance rapidly and to be able to afford to live in the most attractive areas in your town and, above all, it gives you interesting work to do.

For university graduates this interesting work takes many forms which offer much scope and afford the exercise of individuality and originality. In the coming months I will outline some of the opportunities at IBM that will interest you.

"Hi."

"Hi."

"How are you?"

"Fine thanks, and you?"

"O.K. Did you have a nice holiday?"

"Not bad. I got in some good skiing."

"Where were you?"

"Gabriel."

"Snow any good?"

"Not bad. You ski?"

"Yeh, but I had a couple of exams."

"In what?"

"Poli-sci and Soc."

"How were they?"

"Long and pretty rough".

"How'd you do?"

"Not bad. I think I passed. Maybe
a high third."

"Fabulous. What are you taking
next term?"

"Probably Ec and Poli-sci. I didn't
like Soc."

"I don't blame you."

"What'd you do New Years".

"Nothing much. We had a party,
you know".

"Who you with?"

"You wouldn't know her she's
from out of town."

"Any good?"

"Not bad."

"Gotta run. Can't miss the first
lecture."

"Yeh. So long."

"Yeh. See You."

Canada Sends Students To 1958 Brussels Universal And International Exhibition

A chance to earn money while seeing Europe will be given to forty-eight Canadian college students in 1958.

The government has announced that twenty-four men and twenty-four women will be selected from universities across Canada. These students will man the Canadian Pavilion at the Brussels Universal and International Exhibition from April to October of 1958. Successful applicants will be paid \$150 a month plus all expenses, includ-

ing regulation attire, meals, and living accommodations.

Eligible students must be native-born or naturalized Canadians who will be completing their junior or senior year in 1958. Applicants must have a second class standing and the ability to speak English and French, as well as a sound knowledge of the history and geography of Canada. Students in Europe at the time on travelling scholarships and the like will also be considered for the work.

A two-week vacation with pay will be given to the students,

during which they may travel in Europe.

Arrangements will be made for the chosen students regarding the spring examinations and late registration the following term for those returning to school.

Interested students are required to contact the university registrar. Examining teams from the Canadian government will interview candidates nominated by the universities in November, 1957, and selections will be announced the following month.

Seminar On Future Of Canadian Art Organized For Six Universities

Representatives from six Universities will discuss the future of Canadian Art at a seminar to be held on Saturday, January 19 in the Morrice Room of the Montreal Museum of Fine Arts.

Among the guests at this seminar will be representatives from Mount Allison, McMaster, Toronto, U of M, McGill, and Laval. Alan Jarvis, Director of the Na-

tional Gallery, will act as chairman and address the gathering on the role of students in the development of art in Canada.

This seminar is in connection with the exhibition of Canadian Art which will be opened on Friday, January 18, at 5:00 P.M. by His Excellency the Right Honourable Vincent Massey, C.H., Governor General of Canada. This exhibition, entitled "Thirty-Five Painters of Today", has been organized by a joint student committee of the Universities of Montreal and McGill and will feature the works of famous artists from Montreal and Quebec such as Paul-Emile Borduas, Ghitta Calserman, Stanley Cosgrove, Jean Dal-laire, H. W. Jones, Alfred Pellen, Jean-Paul Riopelle, Marion Scott,

Jacques de Tonnancour, and Gordon Webber.

Honorary Presidents of this exhibition are Mgr. Irenée Lussier and Dr. Cyril James, the heads of the Universities of Montreal and McGill, while M. Jean Thibault and Mr. Morris Shohet, Presidents of the Students' Executive Councils of U. of M., and McGill, are the Honorary Vice-Presidents.

Members of the Committee include M. Jean Drapeau and M. Wilfrid Hamel, Mayors of Montreal and Quebec, as well as several Art Directors from the Province of Quebec.

The exhibition will be open to the public from January 19 to February 3, Monday through Saturday — 10 A.M. to 5 P.M. and Sunday — 2 P.M. to 5 P.M.

Assumption Hatnappers Set Ransom

How would you like to wear Prime Minister St. Laurent's hat?

The hats of prominent Canadian officials, which had been stolen from an exhibition at the Canadian University Press Conference turned up recently at Assumption University in Windsor. The Purple and White, newspaper which sponsored the prank, announced that these famous chapeaux would be auctioned, proceeds going to the Hungarian Students' Relief Fund.

Among the available hats are Mr. St. Laurent's hats from Carlton College, Ottawa, and University of Western Ontario, Premier Manning's ten-gallon from the University of Alberta, and Premier Frost's hat from the University of Toronto. Also on sale are the hats of Premier Smallwood of Newfoundland, Mr. Fleming of Toronto, Mr. Stanfield of Nova Scotia, and Mr. Matheson.

These may be bought by sending a sealed bid to the Purple and White at Assumption University. The minimum for these bids are \$35 for all hats except Prime Minister St. Laurent's, for which the minimum is a \$50 bid.

First, second, and final bids are due before January 28th.

Red And White Revue Cast Is Announced

The cast for the forthcoming production of My Fur Lady was announced today. Heading the line-up of characters is Ann Golden who portrays Princess Aurora. Nancy Bacal will be featured as the dashing Lilli Brigida. Margaret Deanesly will represent the female counterpart of the Canadian Army, namely Head of the Canadian Women's Army Corps. Judy Tarlo plays the pride of the North West, the Mountie (Female). Jim Hugesen portrays a reporter from True Canadian Romances, a magazine for the young at heart. Douglas Robertson is the Governor-General of Canada, the Queen's representative and John MacLeod will be seen as Morton the Butler.

The first scene takes place in a blinding snow storm in the invigorating climate of the Canadian North-West. When first seen the eskimos are building a split level igloo.

The Red and White Revue's presentation will be held from February 7th to 13th.

APPLICATIONS SOUGHT

The Students' Executive Council hereby calls for applications for the following executive positions. The application forms can be obtained from George in the Union Tuck Shop and should be returned by the date specified below.

January 18, 1957
Chairman, Awards Banquet.

January 25, 1957
Chairman, Convocation Activities.

Chamber Music Concert Features Noted Pianist

Neil Chotem, young Canadian pianist, will be the guest artist at the McGill Chamber Music Society's concert in Redpath Hall on Tuesday, January 15. Mr. Chotem will be heard in one of Mozart's greatest piano concerti, K. 466 in D minor. An augmented group of players has been engaged for this occasion.

Famous Soloist

Mr. Chotem is well-known throughout Canada as pianist, composer, and conductor. He has appeared as soloist with leading Canadian orchestras, including the Montreal and Toronto symphony orchestras. For the past two years he has conducted his own weekly radio symphonic programme, "Music from Montreal".

Last season, before a large Montreal audience, Mr. Chotem gave a performance of Schumann's Piano Concerto at a special memorial concert of that composer's works, under the direction of Alexander Brodt.

"The Seasons" Featured

The other work to be featured on the programme will be Vivaldi's "The Seasons". Based on poems on the four seasons, this is one of the earliest examples of "programme" music. The many solo violin passages in this work will be played by Hyman Bress, who has previously worked with the McGill Chamber Ensemble and the Montreal String Quartet. Mr. Bress is also known for his many radio and television appearances.

Kenneth Gilbert, young Montreal organist, will play the harpsichord part in "The Seasons". Mr. Gilbert, a winner of "Le Prix d'Europe" in 1953, has recently completed harpsichord and organ studies in Paris.

Campus Concert Series Resumes

The fifth in the series of noon-hour Campus Concerts will take place this Monday, January 14th from 1-2 in Redpath Hall.

Featured this week will be senior singers, pianists and other instrumentalists from McGill's Faculty of Music. Works by Mozart, Gluck, Bach-Vivaldi and Chopin will be included in the programme.

COMING EVENTS

TUESDAY, JANUARY 15
MODERN DANCE CLUB: Meetings in the second term will begin in the R.V.C. Hall. The general group which met on Mondays during the first term will now meet Thursdays at 4 p.m. Anyone interested should come to either of these groups at the first meeting.

WEDNESDAY, JANUARY 16
JUDO CLUB: First meeting on Wednesday. Important that all members attend. Preparations will be made for Athletics Night.

ENGINEERING INSTITUTE: Dr. J.E. Puddington, Director of Applied Chemistry Division of the National Research Council, will address the Clerical Section of the Montreal Branch at 8:15 p.m. His subject is "Sedimentation — Liquid Solids Separation."

McGILL MASTERS MARAUDERS 89-72

HOT ACTION around the backboards as McGill rolled to a crushing 89-72 victory over McMaster in Friday night's intercollegiate opener at the Sir Arthur Currie Gym.

Cross, Wright Brilliant As Cagers Win Opener

The Seniors had little trouble with McMaster University in winning their first game of the season Friday night. The Redmen torped their Hamilton opponents 89-72 in their first intercollegiate basketball contest. The game was played before a relatively large crowd at the Currie gymnasium.

The Redmen scored in the first few seconds and were never pressed by the shorter and weaker McMaster crew. They led 42-30 at the half. In the second frame, McGill came to life as they netted six unanswered baskets. At one time, they led by 36 points. The Marauders closed up the gap in the final five minutes.

Justin "Jut" Cross and Don Wright headed the Redmen attack, accounting for more than half of their team's total. Cross, a 6'3" newcomer, was high man with 20 points, many of which were collected on rebound tap-ins. Jut also stood out under both baskets.

Guard, Don Wright, was the most colorful man on the floor, netting 29 points. Wright, who was McGill's high scorer last year, chalked up his total with a one-hand jump shot and driving lay-ups. He scored eight consecutive points at the start of the second half, by breaking up the Marauder offensive attempts.

Leon DuPlessis and Frank Scheider stood out on the McGill defense. "Dupe", a consistent 20 point per game man, did not fare too well in the point-scoring column, collecting only four points. He was fouled out at the start of the second half. Finny Heffernan and Tim Leary were the other Redmen high scorers with seven points apiece.

Russ Jackson was the big gun for the losers netting 25 points. Centre Doug Marshall tapped in 19 points for the Marauders. McMaster ended the last year's season in last place.

In compiling 89 points, the Redmen displayed their most potent scoring punch in years. McGill would have had a greater edge, had not their defense fallen towards the end of the match. Coach Joe Anderson was especially satisfied with Cross' fine play.

Tuesday, January 15th

- 1:00 P.M. Engineering vs. Law

IMPORTANT SQUASH NOTICE

The Province of Quebec Junior Championships will be held on the McGill courts from January 15-18th. Any student under 21 years of age is eligible. There is no entry fee. Please give your entries immediately at room 3 in the Gym.

RECREATION SKATING

There will be recreational skating to-night from 8 to 10 p.m.

Women's Sports

Freshman Physical Education

All Freshman Women are reminded that registration for the classes of second term takes place at Royal Victoria College in Room 12 on Tuesday, January 15, from 10:00 a.m. to 5:00 p.m. There will be a choice of a number of new activities this term; Apparatus, Tumbling and Stunts, Archery, Golf, Rhythmic Gymnastics, Tap Dance, Badminton, Squash, Fencing, Figure Skating, Modern Dance, Folk Dance, Movement Fundamentals, Conditioning Exercises and Swimming will again be offered. There will be opportunity for those who wish to qualify for various swimming tests, both Red Cross and Royal Life Saving, to do these in a class which will meet Tuesday evenings at 7:15. Many of these classes are limited to a small number and therefore those who desire them should register early. Detailed information is posted on the Physical Education Bulletin Board in R.V.C.

Where there is room, after the Freshmen have registered, upper class women are also permitted to join the classes.

Classes begin on Friday, January 18.

UBC Tops Indians In Senior B Game

The McGill Intermediates lost to Unity Boys' Club 64-47 in Montreal Basketball Senior "B" League action on Friday. Trailing by three points at half time, the Indians fell apart in the final period. They now possess a record of one victory against two defeats.

Bill Miller stood out like a sore thumb for McGill, collecting 29 of his club's total. (MacKinnon played well defensively for the Inters in addition to scoring eight points.) Ian MacIntosh was high scorer for the Westmount crew with 30 points.

Coach Ron Sharpe is having difficulty in rounding out his boys. He is trying to build them up to last years calibre. The team has only one left-over from last years squad in Phil Dezwirek. Morty Cohen and Tim Leary, last year's Intermediate stars are up with the Seniors.

The Indians play again tomorrow at West Hill High School against the Golden Knights.

Women's Badminton

All girls interested in trying out for the Intercollegiate Badminton Team must attend practices every Tuesday night. The first practice begins this Tuesday evening. All those interested in playing are also welcome.

REDMEN PLACE SECOND IN HOCKEY TOURNEY AT RPI

As far as the McGill Redmen hockey variety are concerned, it's too bad that Christmas comes only once a year. This year's holiday season proved to be rather profitable for the puck chasers as they built up a four game unbeaten streak during the lull in the academic session.

The Redmen won two games and tied another in an invitation hockey tournament sponsored by Renasseler Polytechnic Institute at Troy New York during the vacation and were awarded a win over Laval as a result of a successful protest against the Rouge et Or. The Redmen finished the tournament in second place. The University of Montreal were

also awarded a protest win against Laval. Consequently both U of M and McGill picked up two points in the Intercollegiate standings while Laval lost the points that they had accumulated. McGill are now in third place, two behind the Carabins and four behind the front running Toronto Varsity Blues.

Action for the protest stemmed from the fact that the Quebecers used an ineligible player when they beat the U of M 5-1 and the Redmen 6-5 early in December. The player, Hubert Dufour, a defenceman, failed this year at the U of M last season and transferred to Laval. When he turned up in a Laval uniform for the Rouge et

Or's opener against the Carabins, U of M officials started proceedings for the protest and when Dufour played against the Redmen, the locals followed suit.

However, during the tournament at RPI, the Redmen came up with a legitimate win over Laval as they whipped the Quebecers 6-4. The four team round robin tournament ended up with the Redmen and Michigan Tech tied for first place, but the Michigan team were named winners as they scored more goals than the Redmen, and thus relegated the locals to second place.

The Red and White tied Michigan Tech 2-2 in the first game of the tourney when Doug Maule scored the tying goal in the third period on passes from Ross Hughes and Jackie McMullan. Hughes got the other Redmen goal on passes from Leo Konyk and Dick Baltzan.

RPI lost to the Redmen by a 3-2 count as George Genereux scored the winning goal in the third period. Hughes and Phil Turcotte also tallied for the tribe with McMullan picking up a pair of assists. Konyk, Baltzan and Genereux also assisted on the Redmen goals.

Konyk and Hughes each fired hat-tricks as the Redmen finished the tournament by clipping Laval 6-4. Hughes, the tourney's top scorer, also garnered three assists for a six point evening while Baltzan picked up three assists.

Michel Joyal turned in a creditable performance in all the games and was voted to the tournament's first all-star team. Joyal was hurt in the Laval game when a puck hit him in the forehead. John Swaine allowed three goals in his tenure while Joyal was being stitched up, but the latter returned for the third period of that tilt.

Jan Sandelius was named as all-star defenceman while Hughes won the right wing spot. Dougie Maule was voted to the second team defence while Konyk got the left wing berth.

Besides tying McGill, Michigan Tech beat Laval 9-6 and RPI 6-4. RPI and Laval tied 2-2.

The Redmen continue their Intercollegiate schedule this Friday night when they take on the U of M Carabins Friday night at the Winter Stadium. This is the Carabins home game.

WHY ARE WE...

(From page 2)

the university, even, in many cases, a determination to enjoy several years of freedom, and to let the future take care of itself, as the future is, in any case, so uncertain. Those who undertake any serious activity, be it cultural or political, do so without any sympathy from the remainder of society.

These people are entitled to ask whether a university education serves any purpose in a society which does not accept cultural values, and it is, indeed, fortunate that their activities are, in the final assessment, independent of the approval, disapproval or apathy of their fellows, springing, as it does, from a deep-seated need within themselves.

BOXING SQUAD

The following will represent the McGill Boxing Squad against Dartmouth on Athletics Night, Saturday, January 19.

Brian Cowan, Denny Repole, Don Kraymer, Al Leach, Peter Arbouet, Barry Dunseath, Dave Marsh, Pierre Raymond, J. Cris Gilbert, Ossie Downs, Doug Terrierri, Pete Buchman, Johnny Rockingham.

Grad Marks Predicted By U.B.C. Staff

VANCOUVER, B.C. (BUP) — Counsellors at the University of British Columbia can predict the graduating marks of 99 per cent of the students. At least, that phenomenal result was achieved in one test.

Four years ago, the personnel department tested and interviewed 100 first-year students and predicted whether each student would graduate with first class, second class or pass marks. When the 100 students graduated recently, the counsellors learned they were right 99 times.

The counselling service started up in 1945 as a help for veteran students, and was expanded in 1947 to serve all the students.

Entrance Exam.

One of the department's main jobs is to test and counsel first year students. The student takes a 3½-hour test before he enters university, and later goes to see a counsellor.

On the basis of the test, the counsellor can tell the student which faculty he should enter, and whether he is inclined toward law, medicine, engineering, teaching or any other field.

The counselling department gave the first such service in any major Canadian university.

HAVE A HART!...

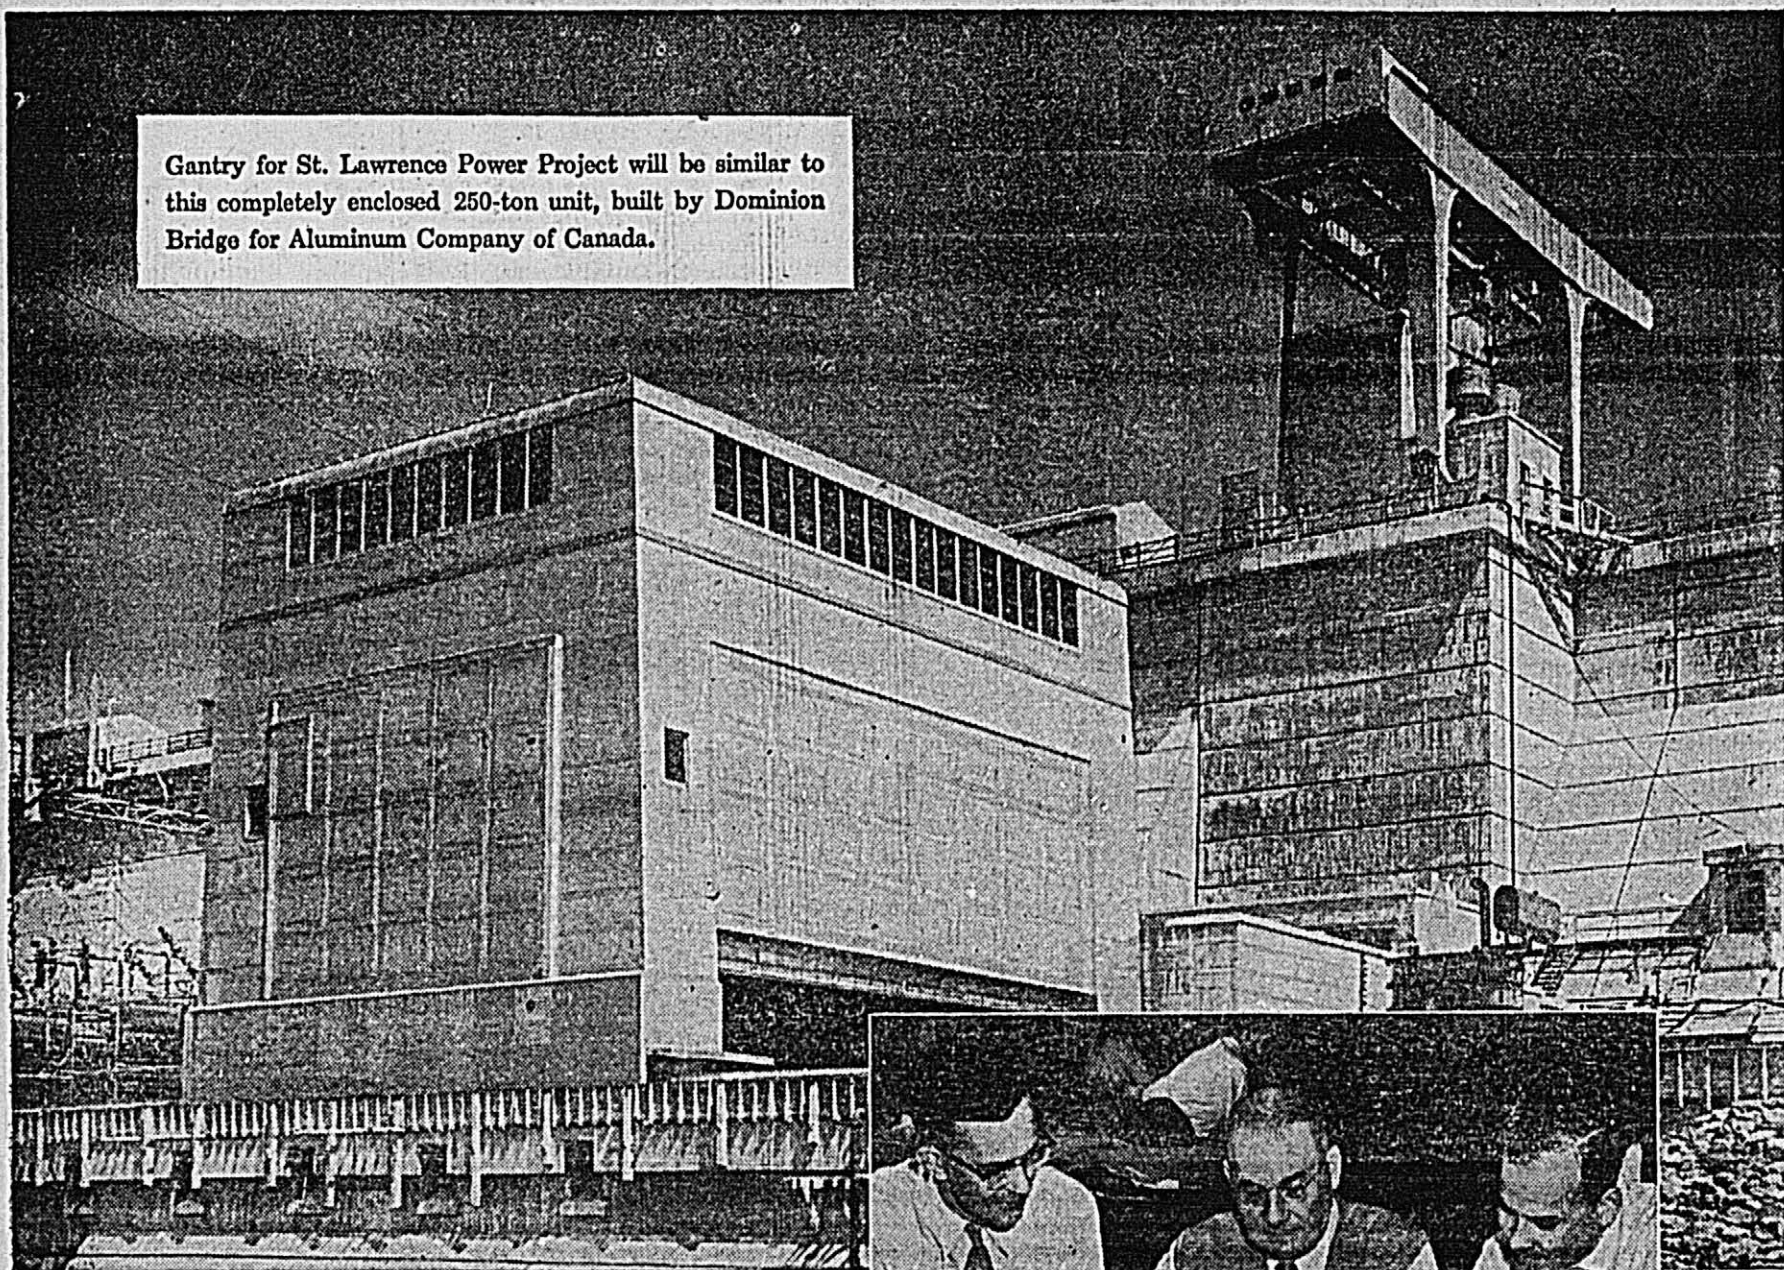

(From page 2)

lawns. There is a beautifully equipped Music Room, full of comfortable, overstuffed chesterfields and chairs where the student can come and collapse and listen to a wealth of recorded Hi-Fi music. There is a large cafeteria whose only equivalent at McGill is Redpath Hall, a pleasant high-roofed place, airy and full of light, with comfortable chairs and long tables where elbows do not stick. One of the finest collection of Contemporary Canadian paintings decorates the walls, and everywhere the eyes is enlightened and enchanted.

But more than the mere facilities of the building is the feeling that here is a real student centre, in the spiritual as well as the material sense, that here students can meet and mingle in pleasant surroundings. The very walls seem to exude an air of welcome. Here, more than anywhere else, is the real heart of the Students University, and of student life. And this is what McGill lacks.

A new student Union should be given the highest priority at McGill. Without a decent place to meet and mingle and exchange ideas, the student loses much of the value of his days at college.

Gantry for St. Lawrence Power Project will be similar to this completely enclosed 250-ton unit, built by Dominion Bridge for Aluminum Company of Canada.

W. L. Laing, chief crane designer at Dominion Bridge, is shown with two of our large staff of mechanical engineers. They worked with others on the design of this major project.

Douglas D. Hunter, (left) McGill '42, has been with the Company since 1936, with interruptions for war service and college work.

Gerald Rothschild, (right) McGill '47, has been with the Company since graduation.

Dominion Bridge Engineers Design

300-TON "TRAVELLING POWER HOUSE" FOR ST. LAWRENCE POWER PROJECT

... designed by our mechanical engineers, one of the largest gantry cranes ever built is now under construction at the Robert H. Saunders Generating Station, Cornwall, Ont.

This crane, weighing over 400 tons, illustrates a new trend in design. Completely enclosed, it serves in effect as a "travelling powerhouse". It incorporates no less than 30 motors for various hoisting and travel movements and has all the facilities and functions normally provided in a conventional powerhouse. This project typifies the extensive resources and experience of the Company in the field of mechanical engineering.

Dominion Bridge, an all-Canadian Company, is the foremost fabricator in Canada of bridges and steel structures.

Less well known is Dominion Bridge's leadership in other engineering fields. Cranes and other handling equipment, hydraulic machinery, boilers for heating and process steam requirements, mining machinery, refinery towers, pulp mill digesters, oil well machinery—these are but a few examples of the diversification of Dominion Bridge operations.

To-day, we have the largest and strongest Canadian force of design engineers in our field. Much of their work is of a pioneering nature, and they are constantly being called upon to solve problems connected with large projects in virtually every type of industry. Theirs is a never-ending challenge:

Build a Future with Dominion Bridge

There are interesting careers awaiting young civil and mechanical engineers in Dominion Bridge Company Limited. With 15 plants from coast to coast, we are now engaged in the largest expansion programme of our 74-year history.

You are cordially invited to write us at P.O. Box 280, Montreal, for descriptive booklets or further information on any question you may have in mind. Or telephone our Personnel Department, MEloree 7-2361. Please mention this magazine.
